

WHO WE ARE WHAT WE DO FOR YOUR BUSINESS

WHO WE ARE

The Clean Energy Council is the peak body for the clean energy industry in Australia.

We represent and work with hundreds of leading businesses operating in solar, wind, energy efficiency, hydro, bioenergy, energy storage, geothermal and marine along with more than 5800 solar installers.

We are committed to accelerating the transformation of Australia's energy system to one that is smarter and cleaner.

WHAT WE DO

We stand up for the clean energy sector and work with local, state and federal governments to solve the technical, political and financial challenges faced by our industry.

We deliver a wide range of services to our members, installers, retailers and the broader clean energy industry with the aim of growing the sector in the interests of all Australians.

HOW WE CAN HELP YOUR BUSINESS

SUPPORTIVE POLICY

We work with our members to develop supportive policies that encourage more clean energy, and provide solutions to complex policy problems for governments.

SMART ADVOCACY

Our strong relationships with all major political parties at the local, state and federal level mean we can provide opportunities for our members to engage directly with the decision-makers who matter.

A STRONG PUBLIC VOICE

We are the voice of the clean energy industry in the media. With the help of our members, we run promotional campaigns and regular events. We produce reports and analysis on the latest industry challenges and trends, and communicate these to government.

RAISING STANDARDS

We're serious about raising standards across all parts of the industry. We run a national accreditation scheme for solar installers, develop best practice guidelines and codes of conduct, help develop Australian Standards, and produce guides to assist the industry and consumers.

GET THE LATEST INSIGHTS

We run events to help you network and gain insights from business leaders and the latest research and analysis. We tell you about breaking news and events and what they mean for your business, and tell the good news stories of our industry.

EVENTS

The Clean Energy Council hosts regular events that encourage members, accredited installers, retailers, government agencies, consultants and other industry stakeholders to build their knowledge and networks, and promote products and services.

Businesses can get involved with Clean Energy Council events by attending, sponsoring, exhibiting, hosting or applying to speak.

For more information on our upcoming events, visit cleanenergycouncil.org.au/events

CLEAN ENERGY COUNCIL PROGRAMS

MEMBERSHIP

Clean Energy Council members receive a range of exclusive benefits, including invitations and discounts to attend events and opportunities to participate in policy-setting meetings and forums.

Our members are the first to hear about industry updates, including relevant information on policy and standards, and are first in line when it comes to sponsorship, presentation and speaking opportunities.

Membership supports the overall work of the Clean Energy Council by helping us advocate for an effective policy and market framework for clean energy while promoting the industry and its achievements.

Membership is tailored to meet a range of needs depending on the size and scope of your business, and is open to companies from any industry. Our important work can only be completed thanks to the ongoing support of our members.

For more information on Clean Energy Council membership, visit cleanenergycouncil.org.au/membership

SOLAR ACCREDITATION

Clean Energy Council Solar Accreditation is a qualification for individuals that shows competence in the design and/or installation of solar power systems.

Solar systems designed and installed by Clean Energy Council-accredited people are eligible for government incentives and rebates. There are currently more than 5800 accredited installers and designers across Australia.

Accreditation with the Clean Energy Council gives solar installers and designers access to continuous professional development and technical support to ensure the best possible standard of solar panel installations across Australia. By choosing an accredited installer, customers can feel confident that their system will be safely installed by a qualified professional.

The Clean Energy Council's Accreditation Team also works closely with Standards Australia and regulators to ensure the rules that govern the small-scale solar sector are fair and robust.

For more information on our work in Solar Accreditation, visit solaraccreditation.com.au

APPROVED SOLAR RETAILERS

The Clean Energy Council Solar Retailer Code of Conduct is a way for solar businesses to show their commitment to responsible sales and marketing activities and solar industry best practice.

It is a voluntary scheme for retail businesses selling solar PV systems to households and businesses. Authorised by the Australian Competition and Consumer Commission, the code aims to lift the bar higher than the minimum requirements set by government and regulations, and bring about a better standard of service in the solar industry.

Companies that pass the strict requirements of the code are able to promote themselves as Clean Energy Council Approved Solar Retailers, a mark of superior quality and service.

The Clean Energy Council works closely with governments and buying groups to create exclusive tender opportunities for Approved Solar Retailers.

For more information on the Solar Retailer Code of Conduct, visit solaraccreditation.com.au/retailers
